Huntley was selected to be part of a Ministry study with bonuses of additional teacher funding. They will be trying a co-learning project. The Student Work Study

Teacher will be at the school 1.5 days per week. This person will take part in class; the students will do an activity based on the learned info and will take that info and analyze it with the teacher and create a learning plan for that student. It is meant to help students improve and be more involved in their learning. Running for remainder of school year. The qualifications of this teacher are very similar to our teachers but have taken special classes and workshops in Literacy. This is being done in both streams (English & French)

Teacher Report- No report as no one present
